-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Non-Final Rejection

Claims 104-110, 112-114 and 116 are pending.

Applicants' traversal, the amendment to claims 104, the cancellation of claims 34-103, 115, 117-171 in paper filed on 3/12/04 is acknowledged and considered.

Drawings

The drawings were received on 9/23/04. These drawings are acceptable. The statement in the office action mailed on 12/10/03 that the drawings received on 9/24/03 were not acceptable is moot because upon further consideration the examiner cannot find anything wrong with the drawings.

Specification

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because the abstract has more than 150 words. Correction is required. See MPEP § 608.01(b).

Claim Objections

Claim 116 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 104, 105, 106, 107, 108, 109, 110, 112, 113, and 114 are rejected under 35 U.S.C. 102(e) as being anticipated by Tam (US 5,932,556). Tam teaches using an oligomer (SEQ ID NO: 4, GGGTTGGAGGGGGTGGTGGGG) in methods of treating a variety of immune disorders, including treating a tumor-induced cachexia (columns 7 and 11), wherein the oligomer has a sequence chosen from and does not comprise a CG dinucleotide. The oligomers comprise from about 11 to about 50 nucleic acid base units (column 6). The oligomers may be DNA, RNA, or various analogs thereof, and include 14-50 base phosphorothioates, and be endonuclease resistant (columns 7-8).
